

JC08 120SS Truck-Mounted Striper

The JC08 is our largest air-spray striper. These machines are custom built and can be configured with paint tank sizes up to 165-gallon capacity each, air compressors as large as 185 CFM, and can accommodate a 104,000 BTU diesel fired paint heating system. Wheelbases can be stretched out long enough to carry extra material and the operator area can be protected with a sunscreen.

Features Include:

- Two 165 gallon stainless steel paint tanks
- 2000 lb. capacity bead tank
- White crossover hose to the centerline carriage outside gun
- 1 paint gun and 1 bead gun on the edge-line carriage
- Paint heat system with 104,000 BTU furnace and two 6" diameter 4 pass heat exchangers
- Hydraulic motor agitator drives
- 185 CFM Ingersal Rand compressor
- David Clark intercom system
- Two hydraulic steerable paint gun carriages
- Two stainless steel diaphragm loading pumps
- 20 gallon stainless steel solvent tank
- Two identical BD-305 control boxes
- Two strobe lights
- Tube style** stainless steel filters
- Panel mounted controls on console
- 30 x 60 arrow board 25 bulb
- Vacuum bead load system
- Hand Paint gun with hose
- Pavement blowers
- Solenoid enclosures
- Sun shield (optional)
